APRS.fi

Live APRS Maps - web-based service to provide real-time mapping of APRS

It collects APRS packets from the APRS-IS network and displays them on interactive maps, allowing users to:
- Track the positions and movements of amateur radio operators and other APRS-equipped entities globally

APRS.fi offers various features, including:
- Historical data retrieval
- Weather station reporting
- Messaging capabilities

It is a valuable tool for the amateur radio community for both operational use and situational awareness.
